Detailed description of project					Type of services provided		
<p>The project aimed to foster linkages between the private sector and the financing institutions through disseminating credit information. Awareness of available credit programs and debt-financing options among potential borrowers was therefore enhanced. The survey comprised of interviews with banks, NGOs involved in credit, and donor-supported credit institutions. The outcome of the study was the production of a credit guide containing up-to-date information regarding loan terms and values, and loan procedures. Target groups, eligibility requirements, and contact details for all financing institutions were also included.</p>					<ul style="list-style-type: none"> <li>• Qualitative review of credit programs and financing services available to the Palestinian private sector</li> </ul>
