Detailed description of project					Type of services provided		
<p>PACE is partnering with these ministries to increase their capacity to deliver critical services and to assist them to become fully functioning institutions after statehood. Specifically, PACE supports improvements in service delivery, financial and human resource management, accountability and transparency.</p> <p>PACE provides technical and advisory support to targeted PA institutions to upgrade capabilities, improve management skills, improve citizen services, and enhance the performance of the public sector institutions and skills of civil servants. Assistance will utilize the Centers of Excellence (COE) methodology in which facilitated self assessments will lead to a reform vision and a capacity development plan for each PA partner.</p> <p>These plans, devised by COE teams composed of mid-level civil servants from each PA partner institution, will emphasize ‘bottom-up’ reform. Ultimately, COE will provide Palestinian civil servants with the understanding of best practices, the motivation to effect change, and the means to do so.</p>					<ul style="list-style-type: none"> • Technical advisory • Administrative and Logistical support • Financial management support • Project startup
